RE: Senior Software Engineer

Dear Hiring Manager,

I'm writing to express my interest in the Software Engineer position at your esteemed organization. With over 7 years of experience in web development, including hands-on work with React, TypeScript, Python, and Node, I have honed my ability to craft efficient and user-focused applications. My recent involvement in "FeedbackHub" at Verizon has further enriched my understanding of building platforms that cater to various user roles and gather vital customer insights. As someone who prioritizes transparency and bases decisions on data, I'm continually eager to learn and innovate.

What excites me most about this opportunity is the alignment between my values and your company's ethos. My hands-on approach to learning, coupled with a strong commitment to employing best practices, resonates with what I perceive to be the core principles of your team. I believe I can add significant value through collaboration, creativity, and technical expertise. I'm enthusiastic about the chance to leverage my skills to contribute to your projects and look forward to the possibility of engaging in a mutually beneficial partnership.

Sincerely,

Jackie Santana
